

Tiguan

Get ready for more

**The Tiguan is the vehicle that'll
give you what you want and
take you where you need to be.**

Abundant in every aspect, it's beautiful, incredibly versatile, luxurious and powerful. You can tailor it personally to suit your style with three trim levels and five engine options. Whatever adventure waits for you out there, prepare for it to be more than you expected.

Style & luxury

More luxury on every level.

State of the art technology

The latest and greatest VW technology.

Infotainment packages

The ultimate in connectivity.

Safety first

Safety made to be so much more.

Constant 4MOTION®

Legendary driving control.

Get ready **to be seen**

The Tiguan's character and looks are a progressive balance of beauty and brawn.

The modern profile is fitted to a new base that's now longer, wider and lower, creating more interior space. For an SUV, it's sportier and more powerful-looking with flared wheel arches, body-coloured bumpers and horizontal chrome bars.

The interior embodies urban refinement with top-end design finishes, urban comforts and spaciousness. With high-end features like an ergonomic leather-covered steering wheel, cruise control and seat configuration, you'll always be inspired to explore more.

More future **technology**

Navigate your day with ease. The Tiguan features useful technology like keyless entry with the electric tailgate which makes loading really easy. To avoid unnecessary bumps and scratches, the Park Pilot will activate when you're reversing, and uses ultrasonic sensors at the front and back to guide you.

Driver Profile Selection*

There are a number of tailored driving modes so you can drive your own way. Choose between Normal, Comfortable, Sport or Eco mode.

*Not available on the 1.4 Trendline.

Your world **fully in touch**

The Tiguan is designed to completely connect your world and your driving experience.

Your music, apps, cellphone and the places you need to go to are all easily synced with the Composition Media infotainment system*. It's complete with an 8" high-resolution display and USB interface that works with iPod/iPhone, Bluetooth, SD Card and MP3.

The "Discover Pro" 9.2" touchscreen has a cutting-edge satellite navigation system that also connects to a DVD drive, Gesture Control, Bluetooth and has a USB interface for iPod/iPhone with our smartphone software. To top it all off, Active Info Display gives you vital driving information on a digital screen so you stay in touch with important driving statistics that's curated by you.

*Composition Media is standard on selected Comfortline and Highline models.

Future-proof safety

The Tiguan is one of the safest SUVs in its class. The safety cage has been designed to protect passengers on every side with reinforced steel B-pillars, and smart technologies like Curtain Protection® will react to the force of a side collision and deploy side airbags.

Head-up Display, only available on the Highline Plus, is simple but powerful. It allows you to keep your eyes on the road while you can see vital driving information in your field of vision. For example: speed, traffic signs and assistance systems. It means your eyes are always on the road and you're less likely to be distracted on long trips. Another very innovative safety feature is the Rest Assist* fatigue detection system that makes sure you're concentrating and alerts you when you're not.

High Beam Control "Light Assist"

Turns the High Beam on or off so it doesn't affect other drivers.

*Standard on selected Comfortline and Highline models.

Smart and in charge

The Tiguan has 4MOTION® which constantly monitors driving conditions and adjusts the power delivery to wheels accordingly.

It works with Hill Descent Control to detect any wheel slips or loss of traction and makes for safer, better off-road performance.

4MOTION® Active Control

Adjusts to specific road conditions.

Automatic Profile

With Driver Profile Selection, you can choose a preferred setting that fits your driving lifestyle. Choose a setting that can change the Tiguan's whole performance between Normal, Comfortable, Sport or Eco mode.

Off-road driving profile

You can also choose a unique four-wheel drive mode, depending on the terrain. Modes cover uneven road surfaces and areas with poor traction. In addition, you can set a unique off-road version that customises Hill Ascent Control.

Turn style **on its head**

The Tiguan 5-seater is a perfectly sized companion on the road. Get it with 17" Steel wheels on the Trendline, 17" Tulsa and Montana alloys on the Comfortline or choose the Highline with sports standard 18" Kingston alloys.

Always room for more

The Tiguan is generous on space in all facets. With 615 litres of boot space, the rear folding seats increase that volume to 1,655. The rear seats are also slidable and can split-fold. Well thought-out, the central armrest even folds down, so long items can be slid into the cabin from the back of the car.

Colours

The illustrations on this page can only be regarded as a general guide as the printing process cannot render the true depth and brilliance of the paint finishes with absolute accuracy. Please note that certain paint and trim combinations may not be available.
